The Specialist Exhibition providing your Business Success

Every two years, scientists and representatives of industry meet at the beautiful Garmisch-Partenkirchen to exchange knowledge as well as experiences in various fields of Plasma Surface Engineering. At PSE 2010 more than 700 participants are expected – thereof more than the half from Europe, with the exception of Germany, from Asia and America – to participate on a range of highly interesting lectures. This event is a great opportunity for exhibitors for networking, presentation and communication. Approximately 50 exhibitors will be expected.
